CISSP Study approach:

This is the approach I use for all the certifications I take; it works very well for most of my students!

1. Watch the certification videos you have. I suggest 1-3 different sources, watch all the videos, 1 time.
2. Read the book you chose. I suggest 1-2 different books, 1 time.
3. Re-watch the videos, 1 time.
4. Re-read the books, 1 time.
5. Do practice questions. For the CISSP do a lot of them ... A LOT.

It is normal for students to do between 3-5000 practice questions.

6. After each practice tests, read all the explanations on the questions you got wrong and then re-study (video/book) all the areas that had questions answered wrong.
7. Do another practice test.
8. Repeat step 6-7 until you hit 80%+ on multiple practice engines.

Do not reuse practice tests, it will not give you an accurate result if you have answered the questions before.
